

Da li smo spremni za svakodnevnu upotrebu veštačke inteligencije?

Prošlo je skoro sedamdeset godina od prve upotrebe termina veštačka inteligencija (VI). U ovom periodu razvoja, kao i primene, VI je imala svoje uspone i padove. I pored toga što se znalo da će primena VI imati ogromnu prekretnicu u raznim oblastima, tek je pojava opštih (generativnih) alata zasnovanih na VI, pokazala koja je moć VI. U okviru ovog predavanja, biće razmatrani uticaji VI na svakodnevne čovekove aktivnosti, uključujući posao, obrazovanje, zabavu, ...

Are we ready for everyday use of artificial intelligence?

Almost seventy years have passed since the first use of the term artificial intelligence (AI). In this period of development, as well as application, AI had its ups and downs. Even though it was known that the application of AI would have a huge turning point in various fields, it was only the emergence of general (generative) tools based on AI that showed the power of AI. In this lecture, the impact of AI on everyday human activities, including work, education, entertainment, will be analysed.
