

NOTICE

At the explicit demand of the authors, Aleksandra Lekić, School of Electrical Engineering, Belgrade, Vujo Drndarević, School of Electrical Engineering Belgrade, the paper "Simulation of Switching Converters Using Linear Capacitor Voltage and Inductor Current Prediction and Correction" has been withdrawn. The paper printed in the electronic edition of the Proceedings Book, reference "INFOTEH-JAHORINA Vol. 14, March 2015., pp. 32-37" is nullified and is treated as a non-existing reference by the Organizer and the publisher of the Proceedings.

Explanation:

The authors of the stated paper addressed the "INFOTEH-JAHORINA 2015" Symposium Organiser with an explicit demand for their paper to be withdrawn from the Proceedings Book which had already been published. In their demand, they stated only personal reasons for such a demand and they did not state any objections directed to the Organizer and publisher of the Proceedings. The Organizer, Faculty of Electrical Engineering at the University of East Sarajevo, created a special Commission consisting of the President of the Organization Board, President of the Program Boards, President of the topic area Electronic Systems, two reviewers of the paper and technical editor of the Proceedings Book. The Commission unanimously concluded that all the procedures related to the paper submission, review, presentation in adequate session and publication in the electronic edition of the Proceedings Book had been completed in a quality manner, on time and pursuant to the Rulebook on the work of the Symposium and that, at the Organizer's side, there are no reasons for subsequent withdrawal of the paper. The Commission especially emphasized that the paper in question is a quality one, and that the Rulebook conditions on the papers to be accepted for possible presentation and publication were accomplished, stating that a paper must be original (there were no criteria qualifying it as a plagiarism) and that it has not been published at some other conference or in a journal (the same paper, or the paper which is mostly the same as the submitted paper).

Dissociating from the authors' personal reasons, the Commission has suggested the authors' demand to be accepted and the withdrawal of the paper to be published in the only possible way.

Topic session Electronic Systems
Prof. Milomir Šoja, PhD

OBAVJEŠTENJE

Na izričit zahtjev autora, Aleksandra Lekić, School of Electrical Engineering, Belgrade, Vujo Drndarević, School of Electrical Engineering Belgrade, rad "Simulation of Switching Converters Using Linear Capacitor Voltage and Inductor Current Prediction and Correction", je povučen. Rad štampan u elektronskom izdanju Zbornika radova, referenca "INFOTEH-JAHORINA Vol. 14, March 2015., pp. 32-37" je ništavan i od strane Organizatora i izdavača Zbornika tretira se kao nepostojeća referenca.

Obrazloženje

Autori navedenog rada obratili su se Organizatoru simpozijuma „INFOTEH-JAHORINA 2015“ sa izričitim zahtjevom da se njihov rad bezuslovno povuče iz već štampanog Zbornika radova. U svom zahtjevu naveli su samo lične razloge zbog kojih su podnijeli zahtjev i nisu naveli primjedbe prema Organizatoru i izdavaču Zbornika. Organizator, Elektrotehnički fakultet Univerziteta u Istočnom Sarajevu, formirao je posebnu Komisiju u koju su imenovani predsjednik Organizacionog odbora, predsjednik Programskog

odbora, predsjednik tematske oblasti Elektronski sistemi, dva recenzenta rada i tehnički urednik Zbornika radova. Komisija je jednoglasno zaključila da su sve procedure vezane za prijem rada, recenziju rada, izlaganje rada u odgovarajućoj sesiji i štampanje rada u elektronskom izdanju Zbornika urađene kvalitetno, na vrijeme i u skladu sa Pravilnikom rada Simpozijuma i da sa strane Organizatora ne postoje razlozi da se rad naknadno povuče. Komisija je posebno naglasila da se radi o kvalitetnom radu i da su ispunjeni uslovi iz Pravilnika o radovima koji se primaju za eventualno izlaganje i objavljivanje u kome se navodi da rad mora da bude originalan (ni po jednom kriterijumu ne može da se podvede pod plagijat) i da nije objavljen na nekoj drugoj konferenciji ili u časopisu (isti rad ili rad u najvećem dijelu isti kao podnijeti rad).

Ograđujući se od ličnih razloga autora, Komisija je predložila da se prihvati zahtjev autora i na jedini mogući način objavi da je navedeni rad povučen.
